

Happy Costumer

Contaminated diesel fuel problems solved, forever!

Dear Sir,

The **Micfil Ultra Fine Filter** according to users around the world from Europe to South America has proven beyond doubt that diesel fuel contamination problems can be eliminated, permanently!

Mine operators, oil rig/platform companies, ships captains/engineers, fleet owners, oil companies and Independent Power Producers, with the Micfil Ultra Fine Filters installed on diesel engines, fuel and lubrication oil systems, have improved the bottom line with zero fuel or oil related breakdowns.

For a cost equating on the Micfil Ultra Fine filter system your engineering staff will have more time to work on more urgent equipment problems.

The Micfil Ultra Fine Filter (0.5micron) will:

- Improve fuel quality (to better than refinery delivered fuel.)
- Reduce down time
- Save wear on injector pumps
- Save wear and or damage on injectors
- Save on OEM filters
- Keep your engines clean (no carbon contamination)
- Save you money

To test the Micfil Ultra Fine Fuel system in your organization, we can arrange an obligation free trial.

The free trial offer consists of one (1) Micfil Ultra Fine Filter canister (to be returned or invoiced) and one (1) Micfil element, trial period 750 hrs (31 days) equal to 3 OEM fuel filter change outs.

To trial the Micfil Ultra Fine Filter canister and 1 element is free, installation by your engineers or technicians.

I'll call you soon, or please feel free to contact me to arrange this free trial offer.

Yours sincerely

Filip de Ruwe
